Chapter 13_Executive Function Disorders

Suggested Readings

Pediatric frontal lobe function

Baron, I. S. (2003). *Neuropsychological evaluation of the child*. Oxford University Press.

Cusack, R., Ball, G., Smyser, C. D., & Dehaene-Lambertz, G. (2016). A neural window on the emergence of cognition. *Annals of the New York Academy of Sciences, 1369*(1), 7–23. https://doi.org/10.1111/nyas.13036

Davidson, M. C., Amso, D., Anderson, L. C., & Diamond, A. (2006). Development of cognitive control and executive functions from 4 to 13 years: Evidence from manipulations of memory, inhibition, and task switching. *Neuropsychologia, 44*(11), 2037–2078. https://doi.org/10.1016/j.neuropsychologia.2006.02.006

Rosch, K. S., & Mostofsky, S. (2019). Development of the frontal lobe. *Handbook of Clinical Neurology, 163*, 351–367. https://doi.org/10.1016/B978-0-12-804281-6.00019-7

Spencer-Smith, M., & Anderson, V. (2009). Healthy and abnormal development of the prefrontal cortex. *Developmental Neurorehabilitation, 12*(5), 279–297. https://doi.org/10.3109/17518420903090701

Taylor, M. J., Doesburg, S. M., & Pang, E. W. (2014). Neuromagnetic vistas into typical and atypical development of frontal lobe functions. *Frontiers in Human Neuroscience, 8*, 453. https://doi.org/10.3389/fnhum.2014.00453

Yeates, K. O., Ris, M. D., Taylor, H. G., & Pennington, B. F. (Eds.). (2010). *Pediatric neuropsychology: Research, theory, and practice* (2nd ed.). Guilford Press.

Frontal lobe phylogeny

Fuster, J. M. (2002). Frontal lobe and cognitive development. *Journal of Neurocytology, 31*(3-5), 373–385. https://doi.org/10.1023/a:1024190429920

Preuss, T. M., & Wise, S. P. (2022). Evolution of prefrontal cortex. *Neuropsychopharmacology, 47*(1), 3–19. https://doi.org/10.1038/s41386-021-01076-5

Smaers, J. B. & Soligo, C. (2013). Brain reorganization, not relative brain size, primarily characterizes anthropoid brain evolution. *Proceedings of the Royal Society of London, Series B: Biological Sciences, 280*(1759), 20130269. https://doi.org/10.1098/rspb.2013.0269

Classic papers on frontal lobe function

Eslinger, P. J., & Damasio, A. R. (1985). Severe disturbance of higher cognition following bilateral frontal lobe ablation: Patient EVR. *Neurology*, *35*(12), 1731–1741. https://doi.org/ 10.1212/wnl.35.12.1731

Ferrier, D .(1874). Experiments on the brain of monkeys—No. 1. *Proceedings of the Royal Society of London, 23*(156–163), 409–430. https://doi.org/10.1098/rspl.1874.0058

Fritsch, G., & Hitzig, E. (1870). “Uber die elecktrische erregbarkeit des grosshirns”. Arch f. Anatomische, Physiologische, und Wissenschaftliche Medizin: 300–332. (Translated in: von Bonin, G., (Ed.). (1960). Some papers on the cerebral cortex (pp. 73–96). Charles Thomas.)

Harlow, J. M. (1868). Recovery from the passage of an iron bar through the head. *Publications of the Massachusetts Medical Society, 2*, 327–347.

Jarvie, H. F. (1954). Frontal lobe wounds causing disinhibition. *Journal of Neurology, Neurosurgery, and Psychiatry, 17*, 14–32. https://doi.org/10.1136/jnnp.17.1.14

Lhermitte, F., Pillon, B., & Serdaru, M. (1986). Human autonomy and the frontal lobes. Part I: Imitation and utilization behaviour: a neuropsychological study of 75 patients. *Annals of Neurology, 19*(4), 326–334. https://doi.org/10.1002/ana.410190404

Luria, A. R. (1980). *Higher cortical functions in man*. Basic Books.

Cytoarchetechtonics

Petrides, M., Tomaiuolo, F., Yeterian, E. H., & Pandya, D. N. (2012). The prefrontal cortex: Comparative architectonic organization in the human and the macaque monkey brains. *Cortex, 48*(1), 46–57. https://doi.org/10.1016/j.cortex.2011.07.002

Connectivity

Barbas, H. (1995). Anatomic basis of cognitive-emotional interactions in the primate prefrontal cortex. *Neuroscience and Biobehavioral Reviews, 19*(3), 499–510. https://doi.org/10.1016/0149-7634(94)00053-4

Dick, A. S., Garic, D, Graziano, P, & Tremblay, P. (2019). The frontal aslant tract (FAT) and its role in speech, language and executive function. *Cortex, 111*,148–163. https://doi.org/10.1016/j.cortex.2018.10.015

Nauta, W. J. H. (1971). The problem of the frontal lobe: A reinterpretation. *Journal of Psychiatric Research, 8*(3–4), 167–187. https://doi.org/10.1016/0022-3956(71)90017-3

Pandya, D. N., & Yeterian, E. H. (1985). Architecture and connections of cortical association areas. In A. Peters & E. G. Jones (Eds.), *Cerebral cortex* (Vol. 4, pp. 3–61). Plenum Press.

Pandya, D. N., & Yeterian, E. H. (1996). Comparison of prefrontal architecture and connections. *Philosophical Transactions of the Royal Society of London. Series B, Biological Sciences, 351*(1346), 1423–1432. https://doi.org/10.1098/rstb.1996.0127

FUNCTIONAL SUBDIVISIONS

Lateral

D'Esposito, M., Postle, B. R., & Rypma, B. (2000). Prefrontal cortical contributions to working memory: Evidence from event-related fMRI studies. *Experimental Brain Research, 133*(1), 3–11. https://doi.org/10.1007/s002210000395

Goldman-Rakic, P. (1996). Regional and cellular fractionation of working memory. *PNAS, 93*(24), 13473–13480. https://doi.org/10.1073/pnas.93.24.13473

McKim, T. H, & Desrochers, T. M. (2022). Reward value enhances sequence monitoring ramping dynamics as ending rewards approach in the rostrolateral prefrontal cortex. *eNeuro, 9(2)*. https://doi.org/10.1523/ENEURO.0003-22.2022

Tanji, J., & Hoshi, E. (2008). Role of the lateral prefrontal cortex in executive behavioral control. *Physiology Review*, *88*(1), 37–57. https://doi.org/10.1152/physrev.00014.2007

Ventro/orbital function

O'Doherty, J. P. (2001). Contributions of the ventromedial prefrontal cortex to goal-directed action selection. *Annals of the New York Academy of Sciences, 1239*, 118–129. https://doi.org/10.1111/j.1749-6632.2011.06290.x

Medial

Butti, C., Santos, M., Uppal, N., & Hof, P. R. (2013). Von Economo neurons: Clinical and evolutionary perspectives. *Cortex, 49*(1), 312–326. https://doi.org/10.1016/j.cortex.2011.10.004

Carter, C. S., & van Veen, V. (2007). Anterior cingulate cortex and conflict detection: An update of theory and data. *Cognitive, Affective & Behavioral Neuroscience, 7*(4), 367–379. https://doi.org/10.3758/cabn.7.4.367

Monosov, I. E., Haber, S. N., Leuthardt, E. C., & Jezzini, A. (2020). Anterior cingulate cortex and the control of dynamic behavior in primates. *Current Biology, 30*(23), R1442–R1454. https://doi.org/10.1016/j.cub.2020.10.009

Nachev, P., Kennard, C., & Husain, M.. (2008). Functional role of the supplementary and pre-supplementary motor areas. *Nature Reviews Neuroscience*, *9*(11), 856–869. https://doi.org/10.1038/nrn2478

Paus, T. (2001). Primate anterior cingulate cortex: Where motor control, drive and cognition interface. *Nature Reviews Neuroscience, 2*, 417–424. https://doi.org/10.1038/35077500

Putnam, P. T., & Chang, S. W. C. (2021). Social processing by the primate medial frontal cortex. *International Review of Neurobiology, 158*, 213–248. https://doi.org/10.1016/bs.irn.2020.12.003

Scepkowski, L. A., & Cronin-Golomb, A. (2003). The alien hand: Cases, categorizations, and anatomical correlates. *Behavioral and Cognitive Neuroscience Reviews, 2*(4), 261–277. https://doi.org/10.1177/1534582303260119

Polar

Mansouri, F. A., Koechlin, E., Rosa, M. G., & Buckley, M. J. (2017). Managing competing goals: A key role for the frontopolar cortex. *Nature Reviews Neuroscience, 18*(11), 645–657. https://doi.org/10.1038/nrn.2017.111

Shammi, P., & Stuss, D. T. (1999). Humour appreciation: A role of the right frontal lobe. *Brain, 122*(4), 657–666. https://doi.org/10.1093/brain/122.4.657

Tsujimoto, S., Genovesio, A., & Wise, S. P. (2011). Frontal pole cortex: Encoding ends at the end of the endbrain. *Trends in Cognitive Science, 15*(4), 169–176. https://doi.org/10.1016/j.tics.2011.02.001

NEUROPSYCHOLOGICAL EVALUATION

Attention

Bahmani, Z., Clark, K., Merrikhi, Y., Mueller, A., Pettine, W., Isabel Vanegas M., Moore, T., & Noudoost, B. (2019). Prefrontal contributions to attention and working memory. *Current Topics in Behavioral Neurosciences,* 41, 129–153. https://doi.org/10.1007/7854_2018_74

Fiebelkorn, I. C., & Kastner, S. (2020). Functional specialization in the attention network. *Annual Review of Psychology, 71,* 221–249. https://doi.org/10.1146/annurev-psych-010418-103429
