

APA PsycNet[®]

AN INTUITIVE SEARCH PLATFORM BUILT FOR THE DISCOVERY AND DELIVERY
OF SOCIAL AND BEHAVIORAL SCIENCE CONTENT

APA PsycNet is the only search platform designed specifically to deliver APA content.

Developed by the American Psychological Association, the leading publisher in the field, this powerful platform is engineered to prepare the next generation of psychologists for a future in the discipline.

“APA PsycNet is a unique product that provides a user-friendly search experience.”
—*Choice Reviews*

What benefits does APA PsycNet provide to my institution?

FASTER ACCESS TO NEW CONTENT AND UPDATES

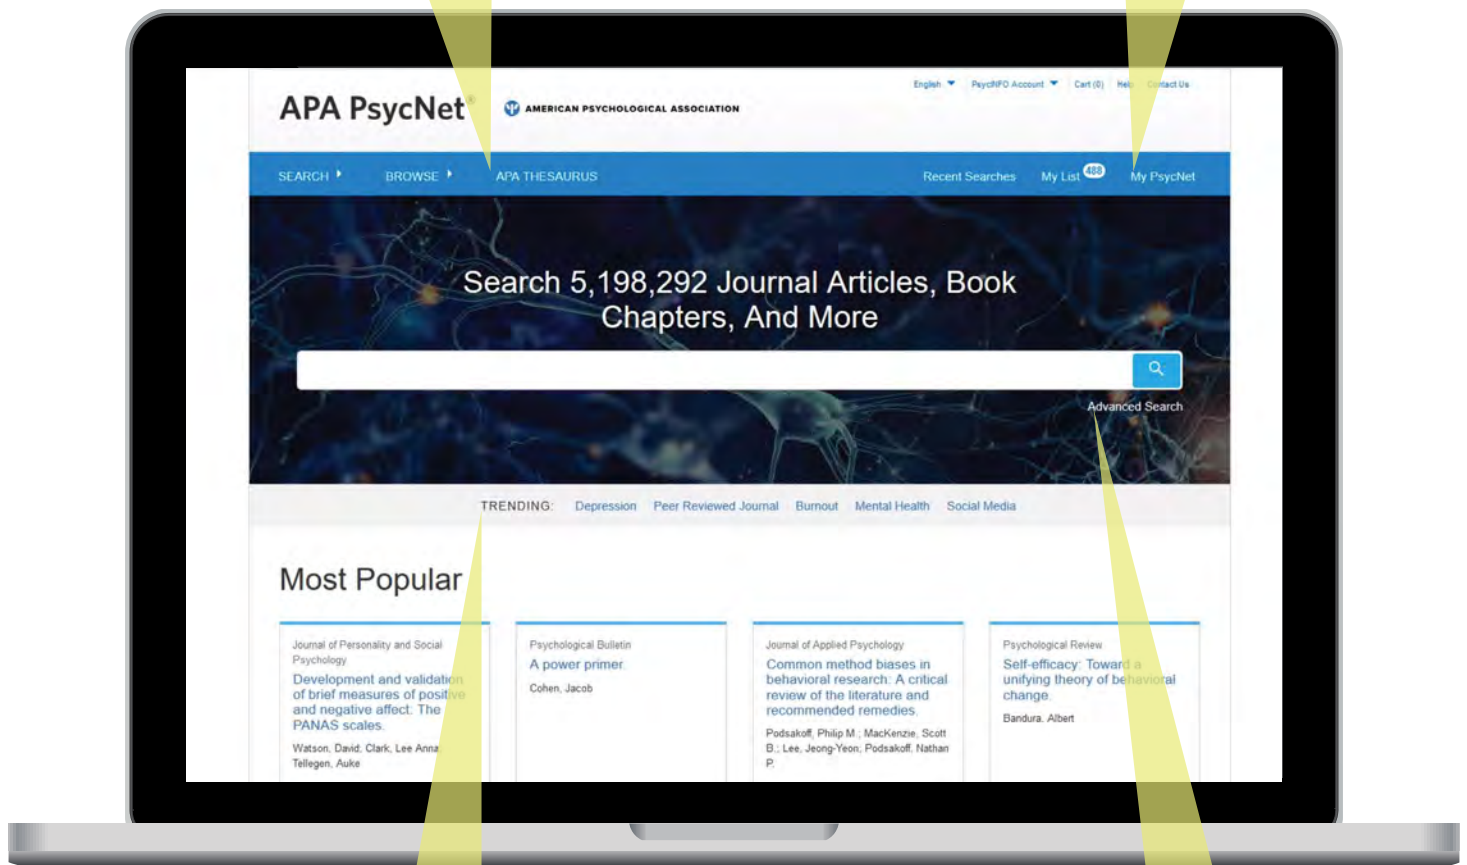

Your users will have access to records and references 3-5 business days ahead of intermediary platforms. For larger updates, such as adding new fields or Thesaurus terms, intermediaries may not fully implement the changes for weeks or months after they are made available on APA PsycNet.

EASY NAVIGATION ACROSS APA PRODUCTS

APA PsycNet includes access to over 5 million records, including peer-reviewed abstracts, full-text journal articles and book chapters, clinical demonstration videos, and psychological tests and measures.

Users can easily locate **Browse**, **Cited References**, and **APA Thesaurus** search functionalities from the navigation dropdowns to aid in discovery.

Save searches or set up alerts to receive notifications for new content and database updates through **My PsycNet**.

View **Trending** searches and **Most Popular** records below the search bar on the homepage.

Access the **Author Lookup**, **Journal Lookup**, and **Test Lookup** search tools from the Advanced Search homepage.

MORE PRECISE SEARCH RESULTS

- **Search within results** to help users narrow their inquiry
- **Filter results** by Age Group, Author, Author Affiliation, Classification, Index Terms, Methodology, Population Group, Publication Type, Source, and Tests and Measures
- **View** all Abstracts or just one record's Abstract
- **Sort records** by Author, Open Access, Relevance, Times Cited, or Title
- **Change the sort default** from "Year" to "Relevance" as the library administrator

The screenshot shows a search results interface. On the left, a sidebar contains a 'Search Within Results' section (highlighted with a red box) with a search input field and a magnifying glass icon. Below this is a 'Filter Results' section with a 'Publication Type' dropdown menu. The main content area displays a list of search results. The first result is titled 'Cyberbullying on social media platforms among un United Arab Emirates.' by Abaido, Ghada M. The second result is titled '“I feel like everyone does it”—Adolescents' percep association between humour, banter, and cyberbul' by Steer, Oonagh L., Betts, Lucy R., Baguley, Thomas, & Binder, Jens F. The third result is titled 'Internet-risk classes of adolescents, dispositional r related quality of life: A mediational model.'

What are key APA PsycNet features I can share with my users?

Abstract

Grounded in Psychology of Working Theory (PWT), the current study investigated predictors of decent work among a sample of e... examined finding that women's ex... adaptability all directly predicted t... marginalization experiences indire... workplace climate for women emp... variable to explore best positioning of this additive construct. Workplace climate did not significantly moderate any model paths; however, it was a unique predictor of work volition and decent work, suggesting that this construct may be better positioned as a predictor variable in understanding the work experiences of women. These results highlight the importance of further investigating the role of workplace climate in PWT as well as the need for refining our understanding of how marginalized employees achieve decent work. Implications of the present study's results are discussed.

APA Dictionary of Psychology ®

marginalization *n.* a reciprocal process through which an individual or group with relatively distinctive qualities, such as idiosyncratic values or customs, becomes identified as one that is not accepted fully into the larger group. —**marginalize** *vb.*

Abstract

Objectives: Crime control theater refers to intuitively appealing laws that appear to address crime while lacking any evidence that they actually do so (e.g., sex offender registration and residence restriction laws, which do not reduce recidivism). Despite their ineffectiveness, public support for such laws tends to be high. **Hypotheses:** We predicted that making people aware of these laws' failure to reduce crime would lower support for them. **Method:** Participants (recruited from Amazon Mechanical Turk; Study 1: $N = 208$, mean age = 35.60, 47.7% self-identified as women and 75.8% as White; Study 2: $N = 147$, mean age = 35.03, 40.1% self-identified as women and 85.0% as White; Study 3: $N = 552$, mean age = 35.86, 42.9% self-identified as women and 78.4% as White) read about sex offender registration and residence restriction policies and rated their support for these laws, confidence in their opinions about them, and perceptions of their efficacy before and after reading counterevidence highlighting these laws' failure to reduce sex crimes. **Results:** Although exposure to counterevidence somewhat lowered support (average within-subjects $d = -0.69$), general attitudes remained positive even at the postcounterevidence phase (average $d = 0.46$ against the scale).

What premium benefits are available to my institution as a subscriber?

IMPROVED AUTHENTICATION OPTIONS

APA PsycNet provides multiple authentication options to ensure your users can access essential research, whether on- or off-campus.

A screenshot of a web form titled "Get access via your Institution". The form has a close button (X) in the top right corner. Below the title, it says "If your institution has a subscription, we'll send you a download link for the selected full-text." There is a text input field labeled "Institutional Email" with a placeholder "Enter your institutional Email". Below the input field is a blue "SUBMIT" button. Below the submit button are two more options: "Log in with your APA account" and "Log in with OpenAthens", each with a plus sign (+) to its right.

- For users that land on APA content via search engines, such as Google Scholar or PubMed, APA PsycNet's "Get Access" feature allows for IP authentication to validate an institution's subscription to APA databases. This feature will provide users with a one-time download link to the requested PDF, providing seamless access to needed research.
- Users outside of your institution's IPs may access an article or book chapter by entering their institutional email to receive a download link to the requested content.
- Remote users can access full-text content via Google CASA links, which use secure tokens to recognize off-campus users.
- Institutions may choose between IP or OpenAthens authentication methods.

TRAINING & CUSTOMER SERVICE

Whether you're a novice or an expert searcher, you'll find a variety of tools in our Search Help and Training Center to get the most out of APA PsycNet. To learn more, visit at.apa.org/psycnet-librarian.

- **Webinar Training** – APA training experts offer live webinars tailored to specific needs of users.
- **Conference Training** – APA staff conduct in-person sessions at library and professional conferences.
- **Self-paced Training** – Visit our APA Publishing Training YouTube channel for in-depth presentations.
- **Search Tips and Tools** – Link to APA tutorials from your website, Libguides, course management software, and other resources.
