Total or average primary and special	11,635	2,632	2,811	77%	2,402	27,506	5.6	127,805	10,177

Note. This summary is compiled from the 2011 annual reports of the Council of Editors and from Central Office records. Corresponding figures for 2010 can be found in the July–August 2011 issue of *American Psychologist*. Numbers are rounded off to the nearest whole number. Jnl. = Journal; JEP = *Journal of Experimental Psychology*.

^a Includes manuscripts for which final editorial decisions had not been made as of December 31, 2011. By the date of this report, decisions will have been reached on most of these manuscripts.

^b The rejection rate indicates the percentage of submitted manuscripts not accepted for publication in a journal. For example, a rejection rate of 76% means that manuscripts submitted to a journal have a 24% chance of acceptance. The average rejection rate for all journals is calculated by dividing total acceptances by total submissions (with pending manuscripts factored out) and subtracting from 100%. It is not an average of the individual journal rejection rates.

^c Includes articles, brief reports, case reports, discussions, monographs, and brief substantive items.

^d "Average lag in months" is calculated as the average time between acceptance and publication for all manuscripts published in 2011.

^e Data for the editors and incoming editors were combined in order to reflect activity for the journals as a whole.

^f Includes award addresses, editorials, and obituaries.

Summary Report of Division Journal Operations, 2011
