Total or average	11,947	2,448	3,064	70%	2,389	31,091	1.7	3.9	82,052	3,900

Note. This summary is compiled from the 2017 annual reports of the Council of Editors and from Central Office records. Corresponding figures for 2016 can be found in the July–August 2016 issue of *American Psychologist*. Numbers are rounded off to the nearest whole number. N/A = data not applicable to journal.

^a Includes manuscripts for which final editorial decisions had not been made as of December 31, 2017. By the date of this report, decisions will have been reached on most of these manuscripts. ^b Indicates the percentage of submitted manuscripts not accepted for publication in a journal. For example, a rejection rate of 76% means that manuscripts submitted to a journal have a 24% chance of acceptance. The average rejection rate for all journals is calculated by dividing total acceptances by total submissions (with pending manuscripts factored out) and subtracting from 100%. It is not an average of the individual journal rejection rates. ^c Includes articles, brief reports, case reports, discussions, monographs, and brief substantive items. ^d Calculated using the acceptance and publication dates for all manuscripts published in 2017. As available, this lag is reported for manuscripts published first online then in print. ^e Excludes award addresses, award biographies, comments, editorials, obituaries, and correction notices.
