Note. This summary is compiled from the 2019 annual reports of the Council of Editors and from Central Office records. Corresponding figures for 2018 can be found in the July–August 2019 issue of *American Psychologist.* Numbers are rounded off to the nearest whole number.

[a] Includes manuscripts for which final editorial decisions had not been made as of the first week of January 2020. By the date of this report, decisions will have been reached on most of these manuscripts. [b] Percentage of submitted manuscripts not accepted for publication in a journal. For example, a rejection rate of 76% means that manuscripts submitted to a journal have a 24% chance of acceptance. The average rejection rate for all journals is calculated by dividing the number of rejected articles by the total number of decisions made in the year. Papers rejected due to being out of the journal's scope are not included in the "rejected" count for this calculation. [c] Submissions that are deemed by the editor as out of the journal's scope are not factored into rejection rates. This is to provide a more accurate indication to authors of the likelihood of their manuscript being accepted by the journal given the submission fit scope criteria. [d] Includes articles, brief reports, case reports, discussions, monographs, and brief substantive items. [e] Calculated using the acceptance and publication dates for all manuscripts published in 2019. As available, this lag is reported for manuscripts published first online then in print. [f] Excludes award addresses, award biographies, comments, editorials, obituaries, and correction notices.

Note. This summary is compiled from the 2019 annual reports of the division journal editors. NR = not reported; N/A = data not applicable to journal. [a] Includes manuscripts for which final editorial decisions had not been made as of December 31, 2019. By the date of this report, decisions will have been reached on most of these manuscripts. [b] Data for the editors and incoming editors were combined to reflect activity for the journals as a whole. [c] Online first data reflect only articles for which data were available.
