Total or average	11,328	2,153	3,013	69%	74%	2,525	36,279	2.2	6.4	85,970	1,928	

Note. This summary is compiled from the 2022 annual reports of the Council of Editors and Central Office records. Corresponding figures for 2021 can be found in the July/August 2022 issue of *American Psychologist*. Numbers are rounded off to the nearest whole number.

^a Includes articles for which final editorial decisions had not been made as of the first week of January 2023. By the date of this report, decisions will have been reached on most of these articles. ^b The rejection rate indicates the percentage of submitted articles not accepted for publication in a journal. For example, a rejection rate of 76% means that articles submitted to a journal have a 24% chance of acceptance. The average rejection rate for all journals is calculated by dividing the number of rejected articles by the total number of decisions made in the year. Articles rejected due to being out of the journal's scope are not included in the "rejected" count for this calculation. ^c Submissions that are deemed by the editor as out of the journal's scope are not factored into rejection rates. This is to provide a more accurate indication to authors of the likelihood of their article being accepted by the journal given the submission fit scope criteria. ^d Includes articles, brief reports, case reports, discussions, monographs, and brief substantive items. ^e "Average lag in months" is calculated using the acceptance and publication dates for all articles published in 2022. As available, this lag is reported for articles published first online and then in print. ^f Excludes award addresses, award biographies, comments, editorials, obituaries, and correction notices.

Note. This summary is compiled from the 2022 annual reports of the division journal editors. NR = not reported; N/A = data not applicable to journal.

^aIncludes articles for which final editorial decisions had not been made as of December 31, 2022. By the date of this report, decisions will have been reached on most of these articles.

^bData for the editors and incoming editors were combined in order to reflect activity for the journals as a whole. ^cOnline first data reflect only articles for which data were available.
