Note. These data are based on information provided by 584 departments that responded to the survey. Presentation of these data by program area/degree subfield, rather than by department, was chosen for purposes of utility. That is, students typically apply to programs/degree subfields rather than departments and would most likely prefer information in this format.

* Due to missing data on public/private status, this column includes data on programs not otherwise indicated.

[a] Incomplete data. Not all programs reported data for all items; therefore, these sums reflect undercounts.
